Product Information Sheet

Bigfoot - Blue Spray Colourant

Analysis: 93g/L sulphonated aromatic dye

Bigfoot is a highly concentrated blue indicator dye for use with pesticides and fertilisers in agricultural, turf and urban situations. Suitable for use with all water based spray mixtures, it clearly indicates where the spray has been applied.

Bigfoot is non-staining and can be washed off skin and equipment. It will dissipate from sprayed areas with sunlight or water.

Bigfoot can be used for colour enhancement of turf. The rate can be varied to achieve the desired result.

Benefits:

- Ideal spray dye marker for spray solutions to clearly identify sprayed areas
- Can be mixed with most herbicides, fungicides, insecticides and fertilisers
- Saves chemical usage by minimising spray overlap and respraying previously treated areas
- Can be used for colour enhancement to turf in dry situations

Product Characteristics:

Colour	Specific Gravity
dark blue liquid	1.07

Pack Sizes:

5L, 20L and 200L
