DIRECTIONS FOR USE

Mix according to the recommended dilution rates and apply as a spray or a drench to turf when immediate growth response is required. Lawnporn Charger contains nutrients and growth promoters that rapidly improve colour and kickstart turf leaf growth. Use a water volume of between 5-15L per 100m², apply in enough water to achieve adequate coverage of the application area depending on the application method (e.g. if using a watering can, a higher water volume will be required compared to a pressure sprayer).
