Very High

ABOUT THE PRODUCT

Nullarbor Couch is perfect for domestic lawns, commercial lawns, and sporting surfaces. Featuring a fine leaf blade which is dark green in colour, it has rapid recovery from damage and has a great wear tolerance. It grows best in full sun conditions.

AFTERCARE

Establishing

- Soak for 10-14 days after installation, or until established

Mowing

- Best cut short at the beginning of spring and kept short until autumn (make sure to fertilise during this period)
- Dethatching can be done in early spring through summer. Recommended every 2 to 3 years based on mowing habits
- Cutting height can be anywhere between 10mm - 36mm

Watering

- Once established, water weekly or as necessary, depending on weather. Use the colour of the lawn as guidance
- Winter watering not usually necessary as the grass is dormant during this time

Fertilising

- Fertilise three times yearly in autumn, spring and summer
- Granular fertiliser recommended
