

ABOUT THE PRODUCT

Sir Walter is a wide-leaf buffalo that is versatile and will grow anywhere; full sun or shade, and in extreme heat, frost or drought. With low maintenance, this lawn is also disease and fungus resistant, self-repairing, soft to touch and low allergy.

This turf is drought tolerant, shade tolerant, wear tolerant and has a 10 year product warranty.

AFTERCARE

Establishing

- Deep water immediately after installation (within half an hour)
- Water thoroughly for 7-10 days, or until established, so turf and roots are kept moist

Mowing

- Mow lightly once the turf has planted root (approximately 2-3 weeks, longer in winter)
- Mow every 5-7 days in the hot months; mow every 3-4 weeks in the cold months
- Mow at 20-50mm cutting height

Watering

- Buffalo responds best to less frequent deep watering
- Once established, water 2-3 times a week in summer months and once a week in winter, pending weather

Fertilising

- Fertilise 3-4 times a year
- Use an organic fertiliser through winter
